DESCRIPTORS College Science; *Employment Statistics; Employment Trends; Engineers; *Manpower Utilization; Research; Science Education; Scientific Enterprise; Scientific Manpower; *Scientific Personnel; Scientists; Universities

ABSTRACT

The data presented in these tabulations are based on the 1976 National Science Foundation survey of scientific and engineering personnel employed at universities and colleges. The data are contained in 60 statistical tables organized under the following broad headings: trends; type of institution; field, employment status, control, educational attainment, function, and sex; 50 leading universities; geographic distribution; research and development; Ph.D. technicians employed in the sciences and engineering; and summary data from survey questionnaires. Notes

- The data presented in these tabulations are based on the 1976 NSF survey of scientific and engineering personnel employed at universities and colleges. An analytical report of the findings will be published at a later date.
- Of 2,210 institutions included in the 1976 survey, the number of respondents was 1,915 or 87 percent; NSF provided estimates for the remaining 295 nonrespondents. Among the 300 doctorate-granting institutions, which account for more than two-thirds of total employment of academic scientists and engineers, the response rate was 96 percent. The high response rate for the larger institutions accounted for relatively low rates of estimation for most of the aggregated figures. The rate of estimation for total scientists and engineers in 1976, for example, comprised only 8 percent of the universe total. It should be noted that rates of imputation refer only to the portion of the total estimated by NSF and, therefore, do not take into account estimates by the institutions.
- Data for earlier years were adjusted downward to reflect the deletion of historians from survey coverage. In 1975 these reductions amounted to approximately 5 percent for all scientists and engineers and 24 percent for all social scientists.
- Requests for additional information concerning the survey results should be addressed to Robert J. Loycano, Division of Science Resources Studies, Washington, D.C. 20550.

Part 1

Statistical Tables

NOTE: Tables B-1, B-2, B-13, B-21, B-23, B-25, B-30/B-40, B-42, and B-44, combine full-time and part-time scientists and engineers.

EMPLOYMENT OF SCIENTISTS AND ENGINEERS

| Trends | Page |
|---|------|
| B-1. By field: 1965-76 | 1 |
| B-2. By function: 1965-76 | 1 |
| B-3. By field and employment status: 1965-76 | 2 |
| B-4. By type of institution and employment status: 1965-76 | 2 |
| B-5. Full-time, by major field and control: 1969-76 | 3 |
| B-6. Full-time, by control and level of attainment: 1969-76 | 4 |
| B-7. Full-time, by field of employment and sex: 1974-76 | 4 |

| By Type of Institution | |
|--|---|
| B-8. In institutions awarding doctorate degrees in the sciences or engineering, by field, control, and employment status: January 1976 | 5 |
| B-9. In institutions awarding master's degrees in the sciences or engineering, by field, control, and employment status: January 1976 | 5 |
| B-10. In institutions awarding bachelor's degrees in the sciences or engineering, by field, control, and employment status: January 1976 | 6 |
| B-11. In institutions awarding degrees in fields other than in the sciences or engineering, by field, control, and employment status: January 1976 | 6 |
| B-12. In two-year institutions, by field, control, and employment status: January 1976 | 7 |

By Field, Employment Status, Control, Educational Attainment, Function, and Sex

| At 50 Leading Universities | |
|--|----|
| B-29. Full-time, at 50 leading universities and colleges: January 1975-76 | 16 |
| B-30. Full-time, at 50 leading public universities, by employment category and sex: January 1976 | 17 |
| B-31. Full-time, at 50 leading private universities, by employment category and sex: January 1976 | 18 |
| B-32. Full-time, at 50 leading institutions awarding doctorate degrees in the sciences or engineering, by sex: January 1976 | 19 |
| B-33. Full-time, at 50 leading institutions awarding master's degrees in the sciences or engineering, by sex: January 1976 | 20 |
| B-34. Full-time, at 50 leading institutions awarding bachelor's degrees in the sciences or engineering, by sex: January 1976 | 21 |
| B-35. Full-time, at 50 leading two-year institutions, by sex: January 1976 | 22 |

By Geographic Distribution

SURVEY OF SCIENTIFIC AND ENGINEERING PERSONNEL EMPLOYED
AT UNIVERSITIES AND COLLEGES, JANUARY 1976

Organizations are requested to complete and return this form to:

NATIONAL SCIENCE FOUNDATION
1800 G Street, N.W.
Washington, D.C. 20550 Attn: UNISG

Name and address of institution:
(Please correct if name or address has changed)

Part 2 Reproductions

of Survey Questionnaire 54
of Survey Instructions and 57

This survey requests employment data as of January 1976. The completed 1976 questionnaire should be returned to NSF by March 31, 1976. Your cooperation in returning the survey questionnaire promptly is appreciated.

Please read the enclosed instructions before completing this form. If you have any questions about the completion of this form, contact Robert Loycano (202-282-7790). Where exact data are not available, use estimates. Please complete all items; estimates by college officials will be better than NSF estimates. Enter "0" as an item total (lines 2100; 2200, etc., are item totals) rather than leave the total blank.

All entries should be in whole numbers. Do not enter decimals or fractions.

Institutions of Higher Education

Include data for branches (including regional campuses) and all organizational units of your institution, such as a medical school or agricultural experiment station. Also include any hospital or clinic owned, operated, or controlled by the university, and integrated operationally with the clinical programs of your medical school. Exclude data for any Federally Funded Research and Development Centers (FFRDC's) administered by your institution. (See below.)

Please classify your institution according to (1) highest degree granted in the sciences or engineering and (2) primary administrative control.

| Highest degree granted in the sciences or engineering during 1974-75 | Check one | One science or engineering field in which highest degree was awarded | Check primary administrative control of your institution |
|--|--------------------------|--|--|
| Ph.D. | <input type="checkbox"/> | | Federal <input type="checkbox"/> |
| M.D., D.D.S., etc. | <input type="checkbox"/> | | State <input type="checkbox"/> |
| Master's | <input type="checkbox"/> | | Local <input type="checkbox"/> |
| Bachelor's or equivalent | <input type="checkbox"/> | | Private <input type="checkbox"/> |
| Degree other than in science or engineering | <input type="checkbox"/> | | |
| 2-year program | <input type="checkbox"/> | | |

Federally Funded Research and Development Centers (FFRDC's). Separate forms have been mailed directly to all

FFRDC's administered by academic institutions. A list of these centers appears on page 2 of the Instructions and Definitions.

| SECTION A. NUMBER OF SCIENTISTS AND ENGINEERS, JANUARY 1976 | | | | | |
|--|--------------|-----------------|------------|----------------------------|--|
| (Include postdoctorals; exclude graduate students) | | | | | |
| Item 1. Full-time scientists and engineers, by field and function in which primarily employed (enter the totals of 1a thru 1g in 1h); and total full-time equivalents (FTE), by function, January 1976 (enter in 1i) | | | | | |
| FIELD OF EMPLOYMENT | TOTAL (1) | TEACHING (2) | R&D (3) | Other activities (4) | |
| a. Engineers (total) | 2110 | | | | |
| (1) Aeronautical & astronautical engineers | 2111 | | | | |
| (2) Chemical engineers | 2112 | | | | |
| (3) Civil engineers | 2113 | | | | |
| (4) Electrical engineers | 2114 | | | | |
| (5) Mechanical engineers | 2115 | | | | |
| (6) Other engineers | 2116 | | | | |
| b. Physical scientists (total) | 2120 | | | | |
| (1) Chemistry | 2121 | | | | |
| (2) Physics | 2122 | | | | |
| (3) Other physical scientists | 2123 | | | | |
| c. Environmental scientists (total) | 2130 | | | | |
| (1) Earth scientists | 2131 | | | | |
| (2) Atmospheric scientists | 2132 | | | | |
| (3) Oceanographers | 2133 | | | | |
| d. Mathematical scientists (total) | 2140 | | | | |
| (1) Mathematicians (exclude computer scientists) | 2141 | | | | |
| (2) Computer scientists (exclude programmers) | 2142 | | | | |
| e. Life scientists (total) | 2150 | | | | |
| (1) Agricultural scientists | 2151 | | | | |
| (2) Biological scientists | 2152 | | | | |
| (3) Medical scientists (see instructions, p. 1) | 2153 | | | | |
| f. Psychologists (total) | 2160 | | | | |
| g. Social scientists (total) (exclude historians) | 2170 | | | | |
| (1) Economists | 2171 | | | | |
| (2) Sociologists | 2172 | | | | |
| (3) Political scientists | 2173 | | | | |
| (4) Other social scientists | 2174 | | | | |
| h. Total headcount (sum of a through g) | 2100 | | | | |
| i. FTE distribution, by function | 2190 | | | | |

1. However, the FTE distribution
only employed basis in line 1h

2. Totals in line 1h should be the same as the corresponding totals in line 1f.
3. The totals reported in item 1i - column 1, should by definition, be the same as the totals in columns 2, 3, and 4 will not necessarily coincide with the functional distribution in line 1h.

| Item 3. Part-time scientists and engineers, by field and function in which primarily employed (enter the totals of 3a thru 3g in 3h); and total FYE's by function, January 1976 (enter in 3i) (exclude graduate students) | | | | | |
|---|--------------|-----------------|------------|----------------------------|--|
| FIELD OF EMPLOYMENT | TOTAL (1) | TEACHING (2) | R&D (3) | Other activities (4) | |
| a. Engineers (total) | 2110 | | | | |
| (1) Aeronautical & astronautical engineers | 2111 | | | | |
| (2) Chemical engineers | 2112 | | | | |
| (3) Civil engineers | 2113 | | | | |
| (4) Electrical engineers | 2114 | | | | |
| (5) Mechanical engineers | 2115 | | | | |
| (6) Other engineers | 2116 | | | | |
| b. Physical scientists (total) | 2120 | | | | |
| (1) Chemistry | 2121 | | | | |
| (2) Physics | 2122 | | | | |
| (3) Other physical scientists | 2123 | | | | |
| c. Environmental scientists (total) | 2130 | | | | |
| (1) Earth scientists | 2131 | | | | |
| (2) Atmospheric scientists | 2132 | | | | |
| (3) Oceanographers | 2133 | | | | |
| d. Mathematical scientists (total) | 2140 | | | | |
| (1) Mathematicians (exclude computer scientists) | 2141 | | | | |
| (2) Computer scientists (exclude programmers) | 2142 | | | | |
| e. Life scientists (total) | 2150 | | | | |
| (1) Agricultural scientists | 2151 | | | | |
| (2) Biological scientists | 2152 | | | | |
| (3) Medical scientists (see instructions, p. 1) | 2153 | | | | |
| f. Psychologists (total) | 2160 | | | | |
| g. Social scientists (total) (exclude historians) | 2170 | | | | |
| (1) Economists | 2171 | | | | |
| (2) Sociologists | 2172 | | | | |
| (3) Political scientists | 2173 | | | | |
| (4) Other social scientists | 2174 | | | | |
| h. Total headcount (sum of a through g) | 2100 | | | | |
| i. FTE distribution, by function | 2190 | | | | |

Item 4. Part-time scientists and engineers, by highest earned degree and function in which primarily employed, January 1976

| HIGHEST EARNED DEGREE | TOTAL (1) | TEACHING (2) | R&D (3) | Other activities (4) |
|---------------------------------|--------------|-----------------|------------|----------------------------|
| Doctorate holders, by type | | | | |
| a. Ph.D. or Sc.D. | 2410 | | | |
| b. Ed.D., D.Ed., etc. | 2420 | | | |
| c. M.D., D.D.S., D.V.M., etc. | 2430 | | | |
| d. Master's | 2440 | | | |
| e. Bachelor's or the equivalent | 2450 | | | |
| f. Equivalent or advanced | 2460 | | | |
| Total (sum of a through f) | 2400 | | | |

2. Totals in line 4b should be the same as the corresponding totals in line 4c.

3. The totals in item 4i (converting quotes on part-time employment into FTE's) will necessarily differ from headcount totals in line 3h.

Item 5. Scientists and engineers with doctorate degrees, by field in which primarily employed, January 1976 (include only Ph.D.'s and Sc.D.'s reported in items 2a and 4a. Exclude M.D., D.D.S. degree, etc.)

| FIELD OF EMPLOYMENT | TOTAL (1) | FULL TIME (2) | PART TIME (3) |
|---|--------------|------------------|------------------|
| a. Engineers | 2510 | | |
| b. Physical scientists | 2520 | | |
| c. Environmental scientists | 2530 | | |
| d. Mathematical scientists | 2540 | | |
| e. Life scientists | 2550 | | |
| f. Psychologists | 2560 | | |
| g. Social scientists (exclude historians) | 2570 | | |
| h. Total (sum of a through g) | 2500 | | |
| <i>(2) Sh. column 2 must equal 2a, column 1 must equal 4a, column 1</i> | | | |

Item 6. Full-time scientists and engineers, by field in which primarily employed, and sex, January 1976.
(Totals reported in item 6, column 1, should equal the totals reported in item 1, column 1.)

| FIELD OF EMPLOYMENT | TOTAL (1) | MEN (2) | WOMEN (3) |
|---|--------------|------------|--------------|
| a. Engineers (total) | 2610 | | |
| (1) Astronautical & astronomical | 2611 | | |
| (2) Chemical engineers | 2612 | | |
| (3) Civil engineers | 2613 | | |
| (4) Electrical engineers | 2614 | | |
| (5) Mechanical engineers | 2615 | | |
| (6) Other engineers | 2616 | | |
| b. Physical scientists (total) | 2620 | | |
| (1) Chemist | 2621 | | |
| (2) Physicist | 2622 | | |
| (3) Other physical scientists | 2623 | | |
| c. Environmental scientists (total) | 2630 | | |
| (1) Earth scientist | 2631 | | |
| (2) Atmospheric scientists | 2632 | | |
| (3) Oceanographer | 2633 | | |
| d. Mathematical scientists (total) | 2640 | | |
| (1) Mathematician (exclude computer scientist) | 2641 | | |
| (2) Computer scientist (exclude programmer) | 2642 | | |
| e. Life scientists (total) | 2650 | | |
| (1) Agricultural scientists | 2651 | | |
| (2) Biological scientist | 2652 | | |
| (3) Medical scientist (see instructions p. 1) | 2653 | | |
| f. Psychologists (total) | 2660 | | |
| g. Social scientists (total) (exclude historians) | 2670 | | |
| (1) Economist | 2671 | | |
| (2) Sociologist | 2672 | | |
| (3) Political scientist | 2673 | | |
| (4) Other social scientists | 2674 | | |
| h. Total (headcount sum of a through g) | 2600 | | |

SECTION B. NUMBER OF TECHNICIANS EMPLOYED IN THE SCIENCES AND ENGINEERING, January 1976

Item 7. Technicians, by field and function in which primarily employed, January 1976

| FIELD OF EMPLOYMENT | TOTAL (1) | R&D (2) | Other activities (3) |
|--------------------------------------|--------------|------------|-------------------------|
| a. Engineering technicians | 2810 | | |
| b. Physical science technicians | 2820 | | |
| c. Environmental science technicians | 2830 | | |
| d. Mathematics technicians | 2840 | | |
| e. Life science technicians | 2850 | | |
| f. Psychology technicians | 2860 | | |
| g. Social science technicians | 2870 | | |
| h. Total (sum of a thru g) | 2800 | | |

CHECK LIST

Please compare your January 1976 personnel data with your response for January 1975, particularly for the following item totals. Please explain below or on a separate sheet any significant changes and where possible, indicate any required adjustments in data reported in previous survey.

1975 1976 DATA CHECK

1. Are all entries rounded to whole numbers? (Do not enter fractions or decimals.)

2. Are the data add to subtotals?

3. Are all items completed? YOUR ESTIMATE \$ will be better than ours. Estimates may be noted on a separate sheet.

4. Are all working and government employees such as a medical school and agricultural experiment station included?

5. Have you included all part-timers?

REMARKS

CONFIDENTIALITY

The National Science Foundation recognizes that its ability to gather much of the enclosed information would be severely impaired if it were not held in confidence. Please indicate below whether or not persons with whom it will be supplied for survey use (that is, the source) will be held in confidence. The Foundation will hold in confidence such information to the extent permitted by law.

NSF Form 724 (11-75)
Instruction sheet

SURVEY OF SCIENTIFIC AND ENGINEERING PERSONNEL EMPLOYED AT UNIVERSITIES AND COLLEGES, JANUARY 1976

INSTRUCTIONS AND DEFINITIONS

The National Science Foundation requests your cooperation in completing the attached questionnaire covering the personnel characteristics of your institution as they relate to the sciences and engineering. This form requests employment data as of January 1976. The questionnaire should be completed and returned to NSF by March 31, 1976.

This survey is comparable to that conducted by this office for last year, which included manpower as of January 1975. The major difference is the deletion of the question concerning graduate students. Where data reported in the current survey differ significantly from those reported in the previous survey, please indicate the reasons for the difference, such as "opening of new medical school," etc., at the end of the questionnaire or on separate sheet of paper.

If you have any questions regarding information requested on this form, write or telephone Mr. Robert Lofcino at the Universities and Nonprofit Institutions Studies Group, Division of Science Resources Studies, National Science Foundation, 1801 F Street, N.W., Washington, D.C. 20550 (Telephone: (202) 222-7790). Additional forms, as well as copies of previous responses, may be obtained by writing to the above address.

Institutions of Higher Education

Academic institutions should include in the form for the parent institution data on

professional and technical personnel employed in the sciences and engineering in all branches and other units of the parent institution, including regional campuses, medical school, or an agricultural experiment station, but excluding any associated Federally Funded Research and Development Center (FFRDC). FFRDC's are to report their data separately from the administering university.

Include: all personnel who were paid a salary or stipend, including postdoctoral, and other staff, such as members of religious orders, who received no remuneration while employed at the institution.

Exclude: (1) personnel on sabbatical or other leave status; (2) personnel employed in branches of your institution located in foreign countries; (3) unpaid voluntary staff; (4) student health service personnel; (5) agricultural extension personnel primarily involved in teaching; (a) farm management marketing; (b) home economics; (c) 4-H youth programs; and, (d) business and public administration.

Medical Schools

Incorporate data for medical schools in the data for the parent institution. Medical schools are those two- or four-year schools of medicine approved by the Council on Medical Education and Hospitals and the Association of American Medical Colleges. Include (1) teaching and R&D functions of hospitals or clinics owned, operated, or controlled by universities and

integrated operationally with the clinical programs of their medical schools; (2) research bureaus or institutes which are integral parts of medical schools; (3) research bureaus and institutes which are nonuniversity owned but are affiliated with the medical school and any university bureaus, and institutes which may be outside the departmental structure of universities, but whose senior research staff members hold teaching appointments with medical schools.

Personnel employed at such organizations that are to be reported in the survey include: physicians (residents and nonresidents), dentists, public health specialists, pharmacists, etc., who spend the greatest proportion of their time in teaching, clinical investigation, or other R&D activities.

Exclude: (1) all medical practitioners who spend the greatest proportion of their time providing patient care, dispensing drugs or services, or in diagnosis, etc.; (2) scientists whose primary employment is an independent hospitals even though they may perform some teaching or research functions for your institution through cooperative agreements; (3) interns; (4) nurses; (5) allied health professionals such as nurse anesthetists, occupational therapists, and physical therapists; and, (6) unpaid voluntary staff at medical or dental schools.

Federally Funded Research and Development Centers

For purposes of this survey, FFRDC's are defined as R&D organizations exclusively or substantially financed by the Government, and administered on a contractual basis by educational institutions or other organizations. The following is a current list of FFRDC's administered by universities and colleges:

Ames Laboratory
Applied Physics Laboratory (Johns Hopkins University)
Argonne National Laboratory
Brookhaven National Laboratory
Center for Naval Analyses
Cerro Tololo Inter-American Observatory
E.O. Lawrence Berkeley Laboratory
E.O. Lawrence Livermore Laboratory
Jet Propulsion Laboratory
Kitt Peak National Observatory
Lincoln Laboratory

Lawrence Livermore Scientific Laboratory
Fermi National Accelerator Laboratory
National Astronomy and Ionosphere Center
National Center for Atmospheric Research
National Radio Astronomy Observatory

Data Elements Required to Complete This Survey

If the following seven characteristics are known for each science and engineering employee, the request can be completed without estimates. The characteristics are further described elsewhere in the instructions.

1. Scope of personnel included:
 - a. Scientists and engineers
 - b. Science and engineering technicians
2. Assignment status:
 - a. Full time
 - b. Part time
3. Field of employment (22 fields in 7 groupings)
4. Full-time equivalent (FTE)
5. Function:
 - a. Teaching
 - b. Research and development
 - c. Other science and engineering activities
6. Highest earned degree:
 - a. Ph.D. or Sc.D.
 - b. Ed.D., J.D., etc.
 - c. M.D., D.D.S., D.V.M., etc.
 - d. Master's
 - e. Bachelor's or its equivalent
7. Classification of scientists and engineers by sex.

Classification of Fields of Employment in the Sciences and Engineering

Listed below are the broad and detailed fields of employment corresponding to the fields shown on the questionnaire with illustrative disciplines in each field.

Please classify persons (including those employed in interdisciplinary or multidisciplinary specializations) in the listed fields with which their activities (teaching, research, or other) are most closely identified. In the case of a scientist employed in a general category

such as science education he should be reported in the field most closely related to the academic requirements of his position—such as mathematics, sociology, or psychology.

It is recognized that because of the importance of academic departments in the organizational structure and, thus, in the information system of institutions of higher education, many institutions must report individuals in terms of the departmental assignment shown in the personnel information system. In some instances, the designated department will not necessarily be the same as the field in which an individual is actually employed.

Because of the departmental structure, however, it is important that respondents include in the survey organizational units that are not part of any academic department. For example, scientists and engineers employed at a computer center not affiliated with a particular academic department should be included in the survey.

ENGINEERING

Aeronautical and astronautical aerodynamics, aerospace, space technology

Chemical: ceramic, petroleum; petroleum refining, process

Civil: architectural, hydraulic, hydrologic, marine, sanitary and environmental, structural, transportation

Electrical: communication, electronic power

Mechanical engineering mechanics

Other engineering: agricultural, industrial and management, metallurgical and materials, mining, nuclear, ocean engineering systems, textile, welding

PHYSICAL SCIENCES

Chemistry: analytical, inorganic, organometallic, organic, pharmaceutical, physical, polymer science (exclude biochemistry)

Physics: acoustics, atomic and molecular, condensed matter, elementary particles, nuclear structure, optics, plasma

Other physical sciences: astronomy (laboratory astrophysics, optical astronomy, radio astronomy, theoretical astrophysics), X-ray, gamma-ray, neutrino astronomy, metallurgy

ENVIRONMENTAL SCIENCES (terrestrial and extraterrestrial)

Earth sciences: engineering geology, general geology, geochemistry, gravimetry, hydrology, dynamic geodynamics, tectonic geodynamics, volcanic hydrogeology, hydrogeophysics, paleogeography, paleontology, geological, geography, environmental, geomorphology, soil sciences

Atmospheric sciences: aeronomy, solar, weather modification, extraterrestrial atmospheres, meteorology

Oceanography: biological oceanography, chemical oceanography, geological oceanography, physical oceanography, marine geophysics

MATHEMATICAL SCIENCES

Mathematics: algebra, analysis, applied mathematics, foundations and logic, geometry, numerical analysis, statistics, topology

Computer science: computer programming, computer and information sciences (general), design, development, and application of computer capabilities to data storage and manipulation, information sciences and systems, systems analysis

LIFE SCIENCES

Agricultural sciences: agronomy, animal science, dairy science, food science and technology, forestry, horticulture, poultry science

Biological sciences: anatomy, bacteriology, biochemistry, biogeography, biophysics, ecology, embryology, entomology, evolutionary biology, genetics, immunology, microbiology, nutrition and metabolism, parasitology, pathology, pharmacology, physical anthropology, physiology, plant sciences, radiobiology, systematics

Medical sciences: internal medicine, neurology, ophthalmology, preventive medicine and public health, psychiatry, radiology, surgery, veterinary medicine, dentistry, pharmacy, podiatry

PSYCHOLOGY: animal behavior, clinical psychology, comparative psychology, counseling and guidance, development and personality, educational personnel, vocational psychology and testing, experimental psychology, ethology, industrial and engineering psychology, social psychology

SOCIAL SCIENCES

Economics: agricultural economics, econometrics and economic statistics, history of economic thought, international economics, industrial, labor and agricultural economics, macroeconomics, microeconomics, public finance and fiscal policy, theory, economic systems and development

Sociology: comparative and historical, complex organizations, culture and social structure, demography, group interactions, social problems and social welfare, sociological theory

Political science: area or regional studies, comparative government, history of political ideas, international relations and law, national, political and legal systems, political theory, public administration

Other social sciences: cultural anthropology, history of science, linguistics, socioeconomic geography, research in education, and research in law, i.e., attempt to assess impact on society of legal systems and practices.

Personnel employed as computer programmers should be reported as technicians (item 2).

Section A—Number of Scientists and Engineers, January 1976

(Includes postdoctorals, excludes graduate students)

This section requests data on full- and part-time employed scientists and engineers. Scientists and engineers include faculty members, postdoctorals, and other professionals (at a level at which the knowledge acquired by academic training equal to a bachelor's degree is essential in the performance of duties) working in the sciences and engineering at your institution, including those in research administration.

Two of the most common methods used to determine an individual's full-time employment are (1) his or her working 40 hours per week, or, (2) teaching 12 credit hours per week. (The preceding serve as illustrations only; the "full-time" workload may vary somewhat from institution to institution.)

Item 1. Full-time scientists and engineers, by field and function in which primarily employed, January 1976.

In items 1a through 1h, the functional classification of professional personnel into teaching (column 2), R&D (column 3), and other science and engineering activities (column 4), should be based on the function in which the person is primarily engaged or employed at the institution. For example, a person engaged in two or all three of the specified functional categories should be classified in the function in which he spends the largest proportion of his time. Exclude outside consulting work and teaching not performed under the auspices of your institution.

In classifying personnel by function, note that determinations made solely on the basis of job titles may produce a significant bias, primarily toward teaching. Persons with professorial rank may also be engaged in research. Among the factors that may be considered in determining the primary function of an individual are both his "separately budgeted" R&D assignment and his estimated departmental research workload.

In classifying an individual under a particular category (teaching, research and development, or other science and engineering activities), take into consideration all official

activities even if carried on in a school or department other than the one in which he holds his principal appointment.

Teaching (column 2) is defined as encompassing those activities connected with degree-credit courses or which are intended to lead ultimately to the granting of degrees or certificates or to professional certification or licensing. Included are such functions as instruction and training performed in connection with degree-credit courses and the administration of such instruction and training.

Include under "teaching" any academic administrator—such as the president, a dean, a department chairman—who holds a science or engineering degree, unless the individual is primarily involved in the administration of R&D activities. If the individual cannot be identified with one specific discipline, report the field of his highest earned degree. Administrators primarily involved in R&D activities should be reported in the "R&D" column. Include instruction of interns, residents, and other professional personnel receiving advanced training such as postdoctoral fellows or trainees.

Time spent by faculty or other staff members in supervising the thesis work of graduate students is considered to be part of the teaching function.

Exclude instructors in nursing, dental hygiene, etc.

Research and development (column 3) include basic and applied research in the sciences and in engineering, and design and development of prototypes and processes.

Research is a systematic, intensive study directed toward fuller knowledge of the subject studied. Included in this function is the preparation for publication of books and papers describing the results of the specific research and development, if carried out as an integral part of that research and development. Also included is the administration of research and development.

Development is the systematic use of knowledge directed toward the design and

production of useful prototypes, materials, devices, systems, methods, or processes. It does not include quality control or routine product testing.

Under other science and engineering activities (column 4) report all professional personnel not primarily employed in teaching or research and development, as defined above. Examples of such activities are agricultural demonstration work not specifically excluded on page 1; adult education (if not degree credit); dissemination of scientific information; student counseling of individuals with a degree in psychology. Exclude hospital employees predominantly involved in patient services, Student Health Service professionals, and other personnel that are not primarily engaged in science or engineering activities. *Do not* use this category to report individuals for which there is difficulty in determining their primary function. It is preferable that you classify each person in the most appropriate functional category according to your best estimate.

Full-time equivalent distribution by function. In line 1, apportion staff members across the three functions on the basis of the proportion of effort or time spent in each of the functions, thus correcting for the "primarily engaged" head-count data reported in line 1h. For example, an individual devoting three-fourths time to teaching and one-fourth to research and development should be counted as 0.75 in teaching and 0.25 in research and development. The FTE values should be cumulated for each function. This sum should then be rounded to the nearest whole number before entering the number on the questionnaire. In item 1i, figures entered in columns (2), (3), and (4) should add to the total in column (1).

Item 2. Full-time scientists and engineers, by highest earned degree and function in which primarily employed, January 1976

For the purposes of this survey, earned degrees are classified in five categories as defined below:

a. "Ph.D. or Sc.D." degrees include all such

earned degrees. Include individual holding both the Ph.D. (or Sc.D.) degree and another doctorate degree.

b. "Ed.D., J.D., etc." include all such earned degrees.

c. "M.D., D.D.S., D.V.M., etc." includes individuals whose highest earned degrees are first-professional medical degrees that indicate the completion of the academic requirements based on programs that require at least two academic years of previous college work for entrance and require a total of at least six academic years of college work for completion. Specifically, include in line 2c first-professional degrees in medicine (M.D.), Dentistry (D.D.S. or D.M.D.), Veterinary Medicine (D.V.M.), Chiropractic or Podiatry (D.S.C. or D.P.), and Osteopathy (D.O.). Individuals holding both the Ph.D. (Sc.D.) degree and a first-professional degree, such as the M.D., should be included in line 2a as mentioned in (a) above.

d. "Master's" degrees include all degrees above the bachelor's and first-professional degree and other-than the doctorate degrees reported in lines 2a thru 2c.

e. "Bachelor's or the equivalent" include all individuals whose highest earned degree is the bachelor's degree or a four- or five-year first professional degree, or who have the equivalent in experience, even if they have not earned such a degree.

Item 3. Part-time scientists and engineers, by field and function in which primarily employed, January 1976

Instructions for item 1(a thru 1h) relating to classification by field and function also relate to part-time professional staff in item 3.

In estimating the full-time equivalents of part-time personnel in item 3, take into account both the overall workload and the proportion of time spent on each of the three functions of activity. For example, if the full-time workload were 40 hours per week, and an individual were estimated to spend 10 hours on teaching and related duties and 6 hours on research, his FTE values would be: Teaching = $\frac{10}{40} \times 10$ = 2.50 R&D =

$\frac{6}{40} \times 10 = 1.50$ Other = $\frac{14}{40} \times 10 = 3.50$

15 + 10. The FTE values should be cumulated for each function and rounded to the nearest whole number before entering the number on the questionnaire. The FTE values entered in columns (2), (3), and (4) should then be summed to arrive at the total to be entered in column (1).

Item 4. Part-time scientists and engineers, by highest earned degree and function in which primarily employed, January 1976

Instructions for item 2 relating to the classification by field and highest earned degree also relate to part-time professional staff in item 3.

Item 5. Scientists and engineers with doctorate degrees, by field in which primarily

employed, January 1976.

Include only Ph.D.'s and Sc.D.'s reported in items 2a and 4a. Exclude Ed.D., J.D., M.D., D.D.S. degrees, etc. The total number in item 5h, column 2 should equal the number shown in item 2a, column 1; the total number in item 5h, column 3 should equal the number shown in item 4a, column 1.

Item 6. Full-time scientists and engineers, by field in which primarily employed and sex, January 1976

Institutions are requested to report total full-time scientists and engineers, by sex and field in which primarily employed. Data in column 1 (total of men and women) should equal data shown in item 1, column 1.

Section B—Number of Technicians Employed in the Sciences and Engineering, January 1976

Item 7. Technicians, by field and function in which primarily employed, January 1976

Technicians include all persons employed in positions which involve technical work at a level requiring knowledge in any of the fields of engineering, mathematics, physical sciences, environmental sciences, life sciences, psychology, or social sciences comparable to that acquired through formal post-high school training (less than a bachelor's degree), such as that obtained at technical institutes, and junior colleges or through equivalent on-the-job training or experience. All personnel performing the

duties described above should be reported as technicians even if they hold a bachelor's or higher degree. Some typical job titles include laboratory technician or assistant, physical science aide, engineering aide, statistical aide, draftsman, and computer programmer.

Exclude graduate students; technicians involved primarily in patient care service in university-affiliated hospitals; craftsmen such as electricians, carpenters, machinists, etc. In the case where undergraduate students, juniors or seniors, are employed in R&D activities, they may, where applicable, be included as technicians.
